Mount's Bay Survey

A further week of geophysical survey was undertaken in April this year. Once again we collected sidescan sonar, magnetic and bathymetric data. From this we have identified over 300 targets which now need to be investigated.

Investigation of the geophysical targets will take place during the week beginning Monday 2nd July, the last days diving will be on Sunday 8th July. We will be using Bill Bowen's boat (a 10m hard boat) and possibly a RIB as well. CISMAS will provide the boat and air. Anyone wishing to take part should contact me NOW as I need to make sure we have enough boat spaces.

NAS Training

We will be running the NAS introduction and Part I courses again this year. The Intro Course will be held on Sunday 16th September, the Part I the following weekend 22nd-23rd of September. Please contact me as soon as possible if you are interested in either of these courses.
